

ALAMGEER KHAN

+92-336-6043862 | khamalamgeer996@gmail.com | LinkedIn
Backend Developer | Node.js Engineer | Full-Stack Developer

PROFESSIONAL SUMMARY

Results-driven Backend Developer with 1+ year of experience building scalable, high-performance web applications. Specialized in Node.js, Express.js, REST/GraphQL APIs, and database optimization. Proven track record of improving system performance by 20% and delivering production-ready features in fast-paced environments. Passionate about clean code, system architecture, and solving complex technical challenges.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL, HTML5, CSS3, LaTeX
Backend: Node.js, Express.js, RESTful APIs, GraphQL, Microservices, API Design
Databases: MongoDB, MySQL, Database Design, Query Optimization, Indexing
Frontend: React.js, Responsive Design, Component Architecture, State Management
Tools & Technologies: Git, GitHub, Postman, npm, JWT Authentication, OAuth
Practices: Agile/Scrum, Code Review, Testing, CI/CD, Performance Optimization, Security Best Practices

PROFESSIONAL EXPERIENCE

Node.js Developer

Codesinc

Sep 2024 – Present

Rahimyar Khan, Punjab, Pakistan

- Architected and deployed 15+ scalable RESTful APIs using Node.js and Express.js, serving 10,000+ daily requests with 99.9% uptime
- Optimized MongoDB database queries and indexing strategies, reducing response time by 40% and improving throughput by 35%
- Implemented JWT-based authentication and role-based authorization system, securing API endpoints for 5,000+ users
- Collaborated with cross-functional teams (frontend, QA, product) to deliver 20+ production features using Agile methodology
- Established code review practices and documentation standards, improving team code quality and reducing bugs by 25%
- Integrated third-party APIs (payment gateways, analytics) and built robust error handling and logging mechanisms

React.js Developer

Takhleeq Soft

Feb 2025 – Aug 2025

Remote

- Developed 10+ responsive, mobile-first React components used across multiple projects, improving UI consistency by 50%
- Transformed Figma/Adobe XD designs into pixel-perfect, reusable React components with 95% design accuracy
- Integrated frontend applications with RESTful APIs, implementing error handling and loading states for optimal UX
- Reduced component re-render time by 30% through React performance optimization (useMemo, useCallback, lazy loading)
- Mentored junior developers on React best practices, component lifecycle, and modern JavaScript (ES6+) patterns

Node.js Developer (Internship)

Autotelematics Pvt Ltd

Aug 2024 – Dec 2024

Karachi, Sindh, Pakistan

- Built real-time telematics backend system processing 1,000+ vehicle data points per second using Node.js and Express.js
- Designed and implemented MongoDB schemas for vehicle tracking data, achieving 20% improvement in data accuracy
- Developed RESTful APIs for real-time GPS tracking, analytics dashboards, and device management with sub-200ms latency
- Collaborated with IoT team to integrate telematics device APIs and implement data validation and sanitization layers
- Identified and resolved performance bottlenecks, reducing server response time by 25% through code optimization

Frontend Developer (Internship)

Career Institute

Jun 2023 – Sep 2023

Rahimyar Khan, Punjab, Pakistan

- Built 8+ fully responsive demo websites (Colorlihub, Bakery, Musafar) using HTML5, CSS3, JavaScript, and Flexbox
- Implemented semantic HTML5 for improved SEO and accessibility, achieving WCAG 2.1 Level AA compliance
- Created interactive UI features with vanilla JavaScript including form validation, DOM manipulation, and event handling
- Ensured cross-browser compatibility (Chrome, Firefox, Safari, Edge) and mobile responsiveness across all projects

EDUCATION

Khawaja Fareed University of Engineering & Information Technology <i>Bachelor of Science in Computer Science</i> • Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Technologies, Software Engineering, Computer Networks	Rahimyar Khan, Pakistan <i>Sep 2019 – Jan 2024</i>
---	---

KEY PROJECTS & ACHIEVEMENTS

- Real-Time Vehicle Tracking System:** Engineered scalable backend handling 50,000+ concurrent connections using Node.js, Express.js, Socket.io, and MongoDB, deployed on AWS with 99.9% uptime
- E-Commerce REST API:** Developed full-featured e-commerce API with user authentication, product catalog, shopping cart, order processing, and payment gateway integration (Stripe/PayPal)
- GraphQL API Gateway:** Built GraphQL API aggregating data from 3+ microservices, reducing frontend API calls by 60% and improving load time by 45%
- Performance Optimization:** Achieved 40% faster API response time through database indexing, query optimization, caching (Redis), and code refactoring across production systems
